

## DMT – Your Partner

In geotechnics and special civil engineering, particularly high demands are placed on reliability and safety. This applies not only with regard to the use of the optimal equipment, but also with regard to the appropriate techniques and work processes. In order to guarantee the highest possible level of safety in this demanding environment, DMT provides comprehensive services under the roof of its “Civil & Mining Engineering” business unit covering all phases of planning and support for complex tasks in geotechnical engineering and special civil engineering.

### For you project we offer:

- Holistic view on projects
- High level of design dependability
- Many years of experience in the design and implementation planning
- Schedule and cost management
- A trusting, cooperative partnership with all participants

## DMT GROUP

Excellence and innovation in everything we do – this is our claim as an independent, global engineering and consulting company in the construction, mining, plant and mechanical engineering sectors. DMT is the “Engineering & Natural Resources” division of the TÜV NORD GROUP.

Sustainable value creation for our clients is always the goal – knowledge, digitalization and internationalization are our success factors. To this end, we count on our 1,100 employees, 14 subsidiaries, 30 locations and 280 years of experience.

In infrastructure, civil engineering and mining, we are general planners and specialists. We implement system and individual solutions in every discipline and bundle competencies for consulting, engineering, tendering, implementation, monitoring, operation and refurbishment, ensuring planning and investment safety for our customers.

**We call this engineering performance.**

Engineering  
Performance

TÜVNORDGROUP

## Established expertise and extensive experience

---

Many years of practical knowledge of our experts in planning and execution provide you with the highest level of security when making decisions for optimal project management.

### Tendering and award phase:

- Preparation of qualified tender documents
- Advice on the selection of subcontractors
- Examination of tenders
- Evaluation of specific proposals
- Support and implementation of contract negotiations
- Drafting of contracts

## Sustainable success for your entire construction project

---

From the very beginning, you will have competent specialists at your service who will accompany and control your project with first-class know-how.

### Planning phase:

- Investigation and assessment of the subsoil with regard to the execution
- Creating Geotechnical Reports
- Analyses of technological and process engineering feasibility
- Identification and evaluation of risks
- Optimization of the interfaces of the trades
- Execution of the design and implementation planning
- Quantity calculation and disposal concept
- Complete services for the conception and budgeting of excavation pits, foundation, drainage, earth and rock construction work

## Project management, control and construction supervision for a successful completion

---

You are always informed about the current status of the project and have up-to-date cost transparency in **every phase** of the project.

### Implementation phase:

- Construction and project management, project control of all the disciplines involved
- Technical construction supervision
- Soil science construction supervision
- Inspection of services and quality assurance
- Budget control and accounting
- Schedule control
- Contract and claim management
- Close networking with the overall portfolio of the DMT / TÜV NORD GROUP
