## Dr Meinolf Gringel appointed vice-president of ZVKKW

**Essen, Germany, 29.05.2017. At its annual meeting on 16 May 2017 the German association for refrigeration, air-conditioning and heat pumps, Zentralverband Kälte Klima Wärmepumpen (ZVKKW), elected Dr Meinolf Gringel as Vice-President. Dr Gringel is a publicly appointed and sworn expert for technical refrigeration systems and manages the Testing Body for Refrigerating, Heating & Air Conditioning Engineering at DMT in Essen, Germany.**

"I am pleased about the vote of confidence from my association colleagues", says Meinolf Gringel, "and the upcoming interesting tasks this honorary position brings with it. I believe that the promotion and development of refrigeration, air conditioning and heating technology is, in any respect, a very important job."

DMT's Testing Body for Refrigerating, Heating & Air Conditioning Engineering is accredited by DAkkS, the national German accreditation body, according to DIN EN ISO/IEC 17025:2005. The centre carries out performance measurements on machines and components for manufacturers and operators of refrigeration and heating technology and is an independent test laboratory for Paris-based EUROVENT-CERTIFICATION in several certification programs.
